DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

On p. 1, line 6, "60/227,647" should be --60/227,674--. Additionally, priority should be cited to parent applications 09/910,091 and 10/244,293. Appropriate correction is required.

Claim Objections

2. Claim 11 is objected to because of the following informalities:

The claim depends on non-existent claim 30. For the purposes of further examination, the examiner will treat this claim as dependent upon claim 10. Appropriate correction is required.

3. Claim 12 is objected to because of the following informalities:

The claim depends on non-existent claim 31. For the purposes of further examination, the examiner will treat this claim as dependent upon claim 11. Appropriate correction is required.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re*

Art Unit: 3662

Ockert, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 1-20 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-20 of prior U.S. Patent No. 6,707,423 B2. This is a double patenting rejection. The claims are word for word duplicates.
